

WEB PO

The image shows a close-up of a person's hand holding a pen over a resume. The resume text is partially visible on the left side of the frame. At the top right, the number '4' is displayed, likely indicating a page number. The overall composition is professional and focused on the resume content.

Falling Into Place

Played by dropping and arranging endless scores of tetrominoes (a family of geometric blocks) onto a platform, Tetris adheres tightly to its popularity. Since its inception in 1984 by Russian computer engineer Alexey Pajitnov for the Electronika 60 mainframe computer, this game has seen hundreds of official incarnations across an impressive range of devices, making it one of the most

Development of Niagara Falls

Niagara Falls, New York • 1855 • Notable Landmarks

Map of Niagara Falls Area:

- 1 Niagara Falls**: American Falls, Bridal Veil Falls, Goat Island
- 2 Suspension Bridge**: 1848-53
- 3 Lewiston-Queenston Suspension Bridge**: 1851-64
- Town of Suspension Bridge**

History:

European immigrants began to build and settle in the area around the Niagara River during the mid seventeenth century. At the time, these lands were predominantly inhabited by Native Americans of the Neutral Nation, as well as a few military outposts of British and French soldiers. A small stronghold was built at the top of the Falls, held subsequently by French, British, and then American soldiers. Eventually, in the early nineteenth century, non-military development of the spot was underway, and a village known as Grand Niagara was formed.

In 1854, just slightly to the North, another village had sprung up during the construction of the first suspension bridges over the river. The area's population steadily grew as more and more folks saw the economic potential that it had; less than half of a century later, with railway bridges and rapids-powered mills revolutionizing the trading and industrial capabilities, these two villages would merge to become what was finally known as the city of Niagara Falls.
